Fighter air base

Plan and design - Ørlandet

F-35 Lightning II | Photo: Forsvarsbygg

Planning and design – Ørland. This assignment covers advisory services for integrated planning of the main base at Ørland and an advanced base at Evenes as well as building plans.

The new fighter base at Ørland comprises planning and design work. An air base is to be established which can accept and operate Norway's new F-35 Lightning II fighters. Design work includes substantial areas of new buildings with associated infrastructure. The first jets to be used in Norway are due for delivery in 2017. One objective is to cause minimum inconvenience to the local population and activity at the air base.

A consortium known as the ALM group, comprising Multiconsult, Asplan Viak AS and LPO Arkitekter, has been established to carry out the planning and design work.

PROJECT

New base for new F-35 Lightning II fighters

PROJECT TYPE

Military facility – base for new F-35 fighters

LOCATION

Ørland

CLIENT

Norwegian Defence Estates Agency

TIME PERIOD

2012 - 2017

KEY NUMBERS

Today's air base covers about six square kilometres

SCOPE OF WORK

- Outline project
- Preliminary project
- Detail design (option)
- Tender drawings (option)
- Tender documents (option)

OUR SERVICES

- Design
