

03\_OIL AND GAS

# Shtokman

## Gas Condensate Field - Phase 1

The Shtokman field is one of the world's largest natural gas fields and lies in the Russian sector of the Barents Sea. Multiconsult has been involved in the development of the onshore gas reception, processing and export plant for the Shtokman phase 1 project since 2007. Contracts with StatoilHydro and Shtokman Development AG have covered the civil area with the responsibility for conceptual studies, pre- and detail engineering and authority documentation related to site preparation. The contract with Technip France has covered conceptual studies and front end engineering and design (FEED) for harbor facilities. Norwegian Barlindhaug Consult and Russian GT Morstroy have been Multiconsult's subcontractors in all contracts.

### PROJECT

Shtokman Gas  
Condensate Field -  
Phase 1

### PROJECT TYPE

Gas reception ,  
processing and  
export facility

### LOCATION

Teriberka, Russia

### CLIENT

StatoilHydro | Shtok-  
man Development  
AG | Technip France

### TIME PERIOD

Engineering start:  
01.07.2008

## OUR SERVICES

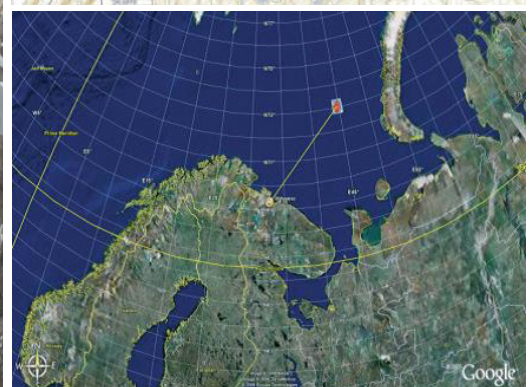

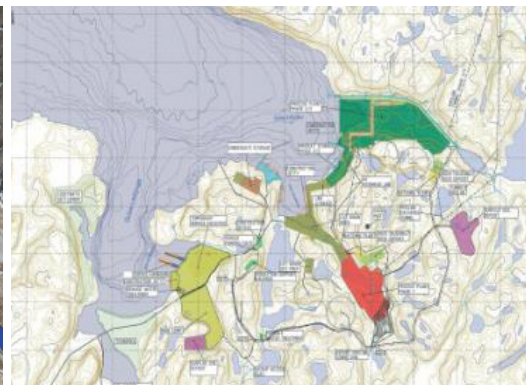

- Conceptual studies
- Layout studies
- Mass balance evaluations
- Tunnel studies
- Site development (blasting/filing)
- Landfall
- Temporary roads and infrastructure
- Underground facilities
- Product jetties
- Breakwater
- Construction jetty
- Pioneer and construction camp
- Foundations

## OTHER SERVICES

- Tender preparation
- Tender evaluation
- Authority documentation

## DISCIPLINES

- Geotechnics
- Landscaping
- Electro/power supply
- Telecom/data
- Roads
- Water and sewage
- Structural
- Jetty design
- Architecture
- CAD/3D
- Environmental
- Geology
